Re: First and Second Semi-Annual Progress Reports
and February 9, 2017 Letter
Former I. Schneid Facility Site HSI #10753
Atlanta, Fulton County, Georgia

Dear Mr. Chapman:

The Georgia Environmental Protection Division (EPD) has received the First and Second Semi-Annual Progress Reports and February 19, 2017 Letter for the above referenced site. After completing a review of the referenced documents, EPD concurs that the remaining free phase product and surface water pathway have been sufficiently addressed. EPD personnel met with Environmental Resources Management (ERM) on May 2, 2017 to discuss the future delisting of the site and agreed that the residual free phase product remaining in the source area should be addressed by a uniform environmental covenant (UEC) that restricts groundwater use at the site and ground disturbance activities within the source area. Please provide EPD with a final compliance status report (CSR) and UEC that addresses the remaining onsite contamination by September 30, 2016. If you have any questions or comments, please contact Mr. Barrett Fischer at (404) 463-7555.

Sincerely,

David Brownlee
Unit Coordinator
Response and Remediation Program
